

HOW TO SUPPORT A FRIEND: PARTYING SAFELY

WHY THINK ABOUT SAFETY DURING A PARTY?

At least 50% of sexual assaults involve alcohol or drugs. 90% of rape survivors were assaulted by someone they knew. If your friends are avid partiers, then you may know that partying, drinking, and/or using drugs can be risky. Besides the dangers of alcohol poisoning and driving under the influence, alcohol and drugs can increase a person's risk of being sexually assaulted. **Keep in mind that while risk management can minimize danger, intoxication is not a substitute for consent nor does it give anyone permission to harm you.** Here are some tips on how to help a friend enjoy parties while staying safe.

HOW CAN I HELP?

BEFORE THE PARTY:

- Work with your friend to plan what you can say or do in an uncomfortable or even threatening situation.
- Use the buddy system: Go to the party with friends and leave together.
- Take turns being the designated driver and always designate a friend who will stay sober to look out for others.
- Encourage your friend to decide on sexual consent beforehand and help them brainstorm how to communicate it to others. Offer to help practice too.
- Establish a signal or code word to ask each other for help getting out of an awkward situation.
- Work with your friend to be aware of personal safety; learn about risks and safety strategies and take a self-defense class on campus.

THINK BEFORE YOU DRINK:

- Be aware of how alcohol and drugs affect your friend. Are they tired? Hungry? Is it late? Taking prescriptions? These factors significantly increase the effect of ONE drink.
- Remind your friend to keep track of their drink and who has handled it.
- Watch the bartender prepare drinks for you and your friends.

- Hold your friend's drink for them while they're in the bathroom, and remind them not to leave their drink unattended.
- Avoid punch and other open drinks.

COMMUNICATE:

- Encourage your friend to set limits with alcohol and stick to them.
- If your friend is considering sexual activity, advise them to carry safe sex supplies, such as condoms and dental dams.
- Remind them to communicate their sexual boundaries clearly to their partner(s) using those strategies you rehearsed together.

DURING THE PARTY:

- Trust your instincts.
- Look out for your friend, and step in if they look uncomfortable, even if you're unsure.
- Don't be afraid to interrupt or make a scene.
- Be aware of the environment and potential dangers, such as someone trying to get them alone or someone handling their drink.

CONTINUED ON BACK...

AFTER THE PARTY:

- Leave together with your designated driver.
- Talk about the party: Are there parts that that your friend doesn't remember?
- Encourage them to take an honest look at their drinking behavior and to learn healthy behaviors and attitudes.

BE AWARE OF THE EFFECTS

OF DATE RAPE DRUGS:

- If your friend begins to feel disoriented or more intoxicated than their alcohol intake allows for, leave immediately for somewhere safe.
- If your friend becomes unconscious or has trouble breathing, **get medical attention immediately.** Do not let them "sleep it off."
